1. The examiner acknowledges the election of the invention of Group II, claims 13-36 without traverse by a response filed on 12/21/05. Applicant should cancel non-elected claims 1-12 in response to this office action. Claims 13-36 are presented for examination.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The drawings filed on 3/25/04 are acceptable by the examiner for examination purposes. However, the Office of Initial Patent Examination (OIPE) reviews drawings initially for publication purposes. Direct any inquiries concerning drawing review for publication purposes to the Office of Initial Patent Examination (OIPE). See MPEP 507 for detail information.
4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification. Furthermore, all claims should be revised carefully to eliminate all grammatical errors and antecedent basis problems.
5. Claims 13-36 are allowable over the prior art of record. If applicants are aware of any prior art better than those are of record, they are required to bring the prior art to the attention of the examiner.

The following is an Examiner's Statement of Reasons for Allowance:

The claimed invention is directed to "a method of controlling communication over a bus communication system in which a plurality of line concentrators, each having line concentrating and switching functions". The examiner has done complete search and found no prior art of record, alone or in combination, teaches or fairly suggests the limitation such as "constructing a virtual port in one line concentrator when another line

concentrator is connected to a physical port provided to the one line concentrator and a bus device is connected to the other line concentrator" in combination with other claimed elements as claimed in independent method claim 13 and at least similar limitations in independent method claim 21. Dependent claims 14-20 and 22-36 further limit the subject matter of the respective parent claims.

Any comments considered necessary by applicant must be submitted in response to this office action to avoid processing delays. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is urged to consider the references. However, the references should be evaluated by what they suggest to one versed in the art, rather than by their specific disclosure.

The prior art submitted by applicant on 3/25/04 has been considered by the examiner and made of record in the file. Applicants are also reminded that each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in 37 CFR 1.56.
